

Author and Interview List by Sub-field

Recommended researchers to cite and interview, grouped by sub-field.

DATE	20 July 2026
PREPARED BY	Martin Etzrodt, Director, Open Science Institute
DISTRIBUTION	OSF Foundation Council
REFERENCE	RPT-2026-BPH-005 · PRJ-BIOPHOTON
NOTE	Public routing only. Emails held in the internal contacts dataset.

• Summary

Recommended researchers to cite and interview for the OSF biophoton book, grouped by the six intellectual sub-fields the map detects. Within each sub-field, researchers are ordered by composite outreach score (proximity to the seed core, centrality, recent activity, topical fit, openness). Contact routing is public: ORCID and institution are listed for all. Corresponding-author emails are held in the internal contacts dataset and are reported here only as a count.

• Biophoton / UPE core

The measurement and theory core of ultra-weak photon emission.

Contact routing: ORCID and institution for all listed. Corresponding-author emails on file for 0 of these in the internal contacts dataset.

• **Consciousness-adjacent (treat separately)**

These researchers cite into the field and share seed papers, but the map places them in a distinct sub-cluster. List them for the critical treatment, not the measurement chapters.
